Form 990-PF IX-A, Line 1  
2016

The 2016 McKnight Conference on Neuroscience was held from Friday evening, May 20 through Monday morning, May 23, 2016. The sessions were held at various locations throughout Minneapolis. The change of location to Minneapolis was to celebrate the 30<sup>th</sup> anniversary of the McKnight Endowment Fund for Neuroscience. One hundred and eighteen neuroscientists attended, including seven members of the board of directors of the McKnight Endowment Fund for Neuroscience, thirteen members of the awards selection committees, five Doupe Fellows, and six guest speakers. Seven current and 3 former McKnight Foundation board members attended a number of sessions; President Kate Wolford attended the Friday night session and two McKnight staff members attended all sessions.

Twenty-six McKnight award recipients, five McKnight Doupe Fellows, and six guest speakers presented the findings of their brain research projects over the course of the weekend. The special lecture topics were: “Order from Disorder: Representations of Olfactory Information in the Cortex,” presented by Dr. Richard Axel, Nobel Laureate and “Dscams, DIPS, and Dprs: Wiring the Fly Brain,” presented by Dr. Larry Zipursky, UCLA. The Brain Disease workshop was on “Memory Disorders,” and featured renowned Alzheimer researchers Drs. David Holtzman, Joachim Herz, and Lennart Mucke. The sessions included:

- Award recipient scientific speaking presentations (three sessions)
- The technology workshop and technology demonstrations (one session)
- Award recipient scientific poster presentations (one session)

Since the conference program incorporates 10 minutes of question and answer following each presentation, the conference audience benefited from an open discussion of the research work presented. Additionally, the poster session and the Tech Demo session are interactive and include open discussions.

The McKnight Conference on Neuroscience provides a forum for: 1) sharing of research developments by and between McKnight awardees through the formal presentations; 2) sharing of research work in informal discussions; and 3) monitoring by the board of directors and review committee members of the research work being supported by the McKnight Endowment Fund for Neuroscience.

The next McKnight Conference on Neuroscience is scheduled to be held June 9-12, 2017 in Aspen, CO. Twelve recent recipients of a McKnight award; four former recipients of a McKnight award, and five guest speakers will present the findings of their brain research projects.

**THE McKNIGHT AWARDS IN NEUROSCIENCE**

The McKnight Endowment Fund for Neuroscience is an independent charitable organization established by The McKnight Foundation to carry out the intention of its founder, William L. McKnight (1887-1979). Mr. McKnight, who led the 3M company for three decades, had a personal interest in memory and its diseases and set aside part of his legacy to bring hope to those suffering from brain injury or disease and cognitive impairment.

The Endowment Fund fulfills this mission by supporting innovative research in neuroscience through three competitive annual awards. The awards complement each other to support both young and established neuroscientists and to encourage interdisciplinary collaboration. Each in a different way, the three programs seek out investigators whose research shows promise in bringing society closer to preventions, treatments, and cures for many devastating diseases. Research supported by the Endowment Fund has furthered understanding of Alzheimer's disease, Parkinson's disease, spinal cord injuries, and many other cognitive impairments.

The Endowment Fund is led by a board of eminent neuroscientists, with administrative support from The McKnight Foundation. Each award has its own selection committee, also made up of prominent scientists. The committee recommends awardees, and the board has the final approval.

**McKnight Scholar Awards**

The McKnight Scholar Awards encourage neuroscientists in the early stages of their careers to focus on disorders of learning and memory. These awards support young scientists who hold the M.D. and/or Ph.D. degree, who have completed formal postdoctoral training, and who demonstrate a commitment to neuroscience. The Endowment Fund especially seeks applicants working on problems that, if solved at the basic level, would have immediate and significant impact on clinically relevant issues, especially those related to deficits of memory and cognition. For descriptions of previous awards, see [www.neuroscience.mcknight.org/](http://www.neuroscience.mcknight.org/).

Each year up to six Scholars are selected to receive three years of support at \$75,000 per year. Funds may be used in any way that will facilitate development of the Scholar's research program, but not for indirect costs. Scholars must have authorization from the home institution to work in the U.S. and must hold tenured or tenure-track positions at their sponsoring institution. Employees of the Howard Hughes Medical Institute or scientists within the intramural program of the National Institutes of Health are not eligible.

Application materials are available in September each year, and completed applications should be emailed to an email account set up for this purpose ([neuro@mcknight.org](mailto:neuro@mcknight.org)) in early January of the following year. Each applicant must ensure that four letters of reference are submitted to the email account; these letters are an integral part of the application. Awards are announced in May and begin on July 1.

## **McKnight Technological Innovations in Neuroscience Awards**

These awards support scientists working on new and unusual approaches to understanding brain function. The program seeks to advance and enlarge the range of technologies available to the neurosciences and does not support research based primarily on existing techniques. The Fund is especially interested in how technology may be used or adapted to monitor, manipulate, analyze, or model brain function at any level, from the molecular to the entire organism. Collaborative and cross-disciplinary projects are encouraged. For descriptions of previous awards, see [www.neuroscience.mcknight.org/](http://www.neuroscience.mcknight.org/).

The first step is to submit a two-page letter of intent describing the project and how the technology involved will enrich the neurosciences and become accessible to other research in the field. Investigators must have authorization from the home institution to work in the U.S. and must hold tenured or tenure-track positions at their sponsoring institution. Funds may be used toward a variety of research activities, but not the recipient's salary. Employees of the Howard Hughes Medical Institute or scientists within the intramural program of the National Institutes of Health are not eligible.

The selection committee will invite a few applicants to send detailed proposals, from which up to three awards will be made. Each award provides \$100,000 annually for two years. Letters of intent are due in early December and should be emailed to an email account set up for this purpose ([neuro@mcknight.org](mailto:neuro@mcknight.org)) for consideration. Awards are announced in late June and begin on August 1.

## **McKnight Memory and Cognitive Disorders Awards**

The Memory and Cognitive Disorders Awards support neuroscientists who are working to apply the knowledge achieved through basic or clinical research to human brain disorders that affect memory or cognition, e.g. Alzheimer's Disease. They are designed to stimulate innovative approaches that might lead to therapies and cures. Collaborative and cross-disciplinary projects are encouraged. For descriptions of previous awards, see [www.neuroscience.mcknight.org/](http://www.neuroscience.mcknight.org/).

The first step is to submit a two-page letter of intent describing the project and how the research will be applied to improving the understanding of a brain disorder or disease, especially diseases related to memory or cognitive disorders. The letter should clearly describe how the proposed research will uncover mechanisms of brain injury or disease and how it will translate to diagnosis, prevention, treatment, or cure. Investigators must have authorization from the home institution to work in the U.S. and must hold tenured or tenure-track positions at their sponsoring institution. Funds may be used toward a variety of research activities but not the recipient's salary. Employees of the Howard Hughes Medical Institute or scientists within the intramural program of the National Institutes of Health are not eligible.

The selection committee will invite a few applicants to submit detailed proposals, from which up to four awards will be selected. Each provides \$100,000 annually for three years. Letters of intent are due in late March/early April and should be emailed to an email account set up for this purpose ([neuro@mcknight.org](mailto:neuro@mcknight.org)) for consideration. Awards are announced in December and begin February 1 of the following year.
